
Safety Planning for Behavioral Health Professionals

A LOOK INTO THE SAFETY PLANNING PROCESS

December 12TH, 2025

Training Disclaimer

This training is hosted by Iowa's Center of Excellence for Behavioral Health (CEBH). While Iowa CEBH is partly sponsored by the Iowa Department of Health and Human Services (Iowa HHS), please note that the views, opinions, and content shared in today's training are those of our trainers and do not necessarily reflect the views, opinions, or policies of Iowa HHS.

Course Objectives

1. Describe the purpose of safety planning and identify clinical situations where safety planning is appropriate.
2. Demonstrate collaborative strategies for engaging clients in the safety planning process.
3. Identify and apply the six components of the Stanley-Brown safety plan and develop strategies to address common barriers.

Before We Continue...

- What are your thoughts on safety planning?
 - Use a device to contribute to the following word cloud
 - Could be how you feel about using safety plans, whether you think they're important or not, any thoughts that pop up when we say, "safety plan"

SAFETY PLAN OVERVIEW

Safety Planning Characteristics

Safety Plans are:

- A standalone intervention
- Proactive
- Collaborative
- Personalized to the client
- Specific
- A tool to increase safety
- Able to be completed by any health professional with training

Safety Plans are Not:

- Set in stone, unchangeable
- Premade
- Meant to replace long-term care
 - Not focused on changing underlying thoughts/conditions

What About “No-Suicide Contracts”?

- Proven ineffective
- Lack of actionable steps for client
- May have harmful impact

When to Make a Safety Plan

- Client is exhibiting thoughts of suicide
 - Emergency departments
 - Trauma centers
 - Crisis hot lines
 - Psychiatric inpatient units
 - Outpatient setting
 - Acute care settings (e.g., Mobile Care Teams)

When to Make a Safety Plan Continued

Risk Level	Characteristics	Safety Plan Warranted?
Low	Suicide Ideation	Yes
Medium	Suicide Ideation + Plan	Yes
High	Suicide Ideation + Plan + Intent	Not Necessarily

Variations

Stanley-Brown

Most Common – Our focus for today

SAFETY-A

Formally known as Family Intervention for Suicide Prevention
Youth focus – highlights family involvement

CAMS Stabilization Plan

Similar to the Stanley-Brown – More focused on problem solving, treatment and identifying barriers to treatment

Approaching the Safety Plan with Clients

- Explain concern for safety
- Introduce safety plan
- Ask before starting
- Adjust for development

SAFETY PLAN COMPONENTS

Stanley-Brown Safety Plan Components

Warning Signs

Distractions

Individual Coping Skills

Professional Resources

Social Supports

Making the Client's Environment Safe

Warning Signs

- Indicators of possible incoming crisis
- Types of warning signs
 - Internal Cues
 - External Cues

Individual Coping Skills

- Independent activities
- Enjoyable
- Lean on past coping skills

Social Supports

- Good Candidates for Social Supports
 - Trusted by client
 - Client is comfortable discussing crisis and/or thoughts of suicide with support

Distractions

People

- Take mind off pain/stress
- Clients do NOT have to discuss crisis
- Examples
 - Friend(s)
 - Neighbor
 - Family member

Places

- Safe locations
- Takes mind off crisis
- Examples
 - Coffee shop
 - Library
 - Religious spaces

Professional Resources

- Higher level of care that can be provided
 - Therapists
 - 988 or 911
 - Iowa Warmline
 - Crisis stabilization locations
 - Mobile Crisis Team
- Which options make the most sense for the client?

YourLifelowa.org

IOWA

Safety Planning for Behavioral Health Professionals

Making the Environment Safe

- Reducing Access to Lethal Means
 - Ask about client's suicide plan
 - Collaborate on reasonable steps to reduce access
- Common Means
 - Guns/firearms
 - Medication
 - Methods of suffocation
 - Sharps

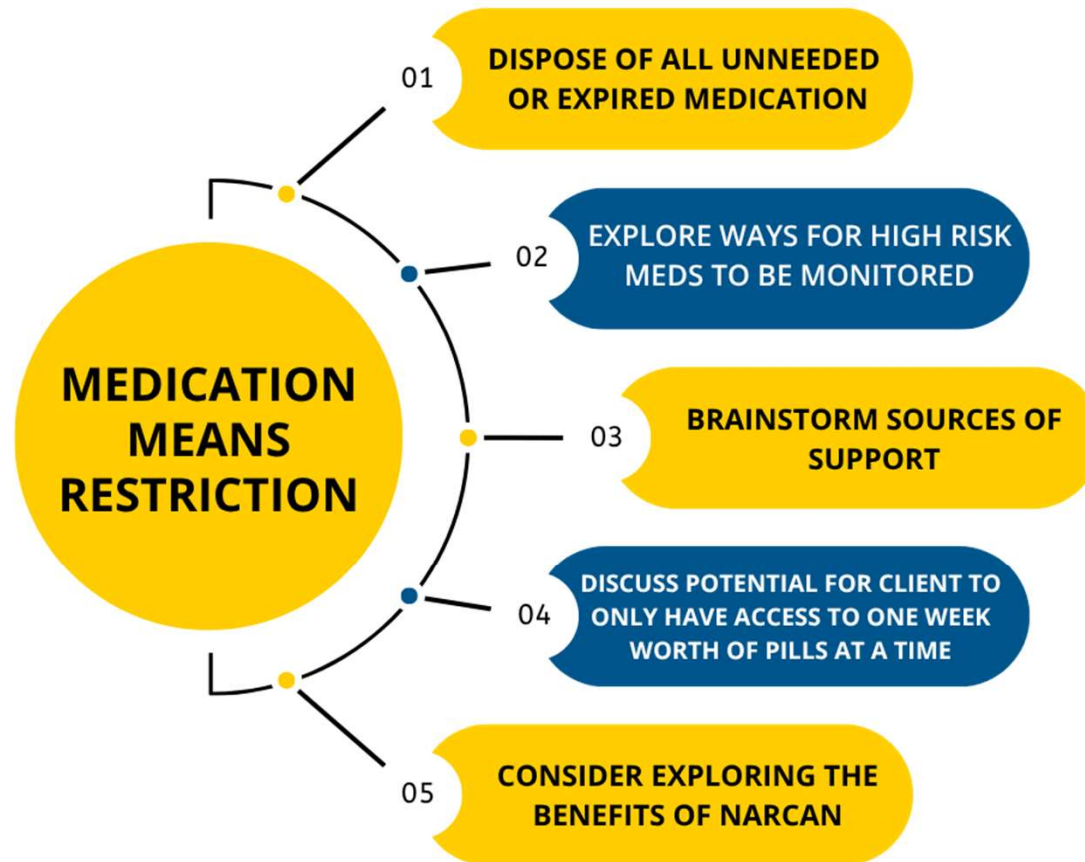

Making the Environment Safe – Firearms

Making the Environment Safe – Medication

Making the Environment Safe – Suffocation and Sharps

Methods of Suffocation

- Identify item(s) in client's suicide plan
 - Pet leashes
 - Extension cords
 - Ropes
 - Belts
 - Plastic Bags
- Explore solutions to limit access and/or increase time to access said item

Sharps

- Identify sharps in home – especially ones in client's suicide plan
- Determine doable restriction methods
 - Remove items from home
 - Lock items away
 - Check-in, check-out system
 - Designated 'safe' place (in or out of home)

Developing High Quality Safety Plans

- Filling out all safety plan categories
- Be specific
- Be flexible
- Foster autonomy
- Complete with trained professional
- Be realistic
 - What is doable for the client?

ENGAGING CLIENTS

Engagement Strategies

- Build rapport
- Actively listen
- Utilize previous conversations/make mental notes

Person-First / Strengths Based Language

- See the person, not the condition
- What strengths does this client exhibit?

Deficits-Based	Strengths-Based
Addict	Person with a substance use disorder
Frequent Flyer	Utilizes services and supports when necessary
Hostile, Aggressive	Protective
Helpless/Hopeless	Unaware of capabilities/opportunities
Mentally ill	Person with a mental illness
Lazy	Ambivalent, Working to build hope

Manipulative	Resourceful
Unfit parent	Person experiencing barriers to successful parenting
Resistant	Chooses not to, Isn't ready for, Not open to
Suffering with	Working to recover from; experiencing; living with
Abuses the system	Good self-advocate
Weaknesses	Barriers to change or needs

When to Engage with Others Besides the Client

- Working with youth – if/when appropriate
 - Families, Parents, Schools
- Contacting support services with client
- People that the client is comfortable with

SAFETY PLANS WORK

There is Hope.

- 1 Write 3 warning signs that a crisis may be developing.

- 2 Write 3 internal coping strategies that can take your mind off your problems.

- 3 Who/What are 3 people or places that provide distraction?
(Write name/place and phone numbers)

- 4 Who can you ask for help? (Write name/place and phone numbers)

- 5 Professionals or agencies you can contact during a crisis:

Clinician _____ Phone _____

Local Urgent Care or Emergency Department: _____

Address _____ Phone _____

Text or call 988 or chat 988lifeline.org

- 6 Write out a plan to make your environment safer.
(Write 2 things)

LIFELINE

Modified from Stanley & Brown (2021)

PEP24-08-03-007

STANLEY - BROWN SAFETY PLAN

STEP 1: WARNING SIGNS:

1. _____
2. _____
3. _____

STEP 2: INTERNAL COPING STRATEGIES – THINGS I CAN DO TO TAKE MY MIND OFF MY PROBLEMS WITHOUT CONTACTING ANOTHER PERSON:

1. _____
2. _____
3. _____

STEP 3: PEOPLE AND SOCIAL SETTINGS THAT PROVIDE DISTRACTION:

1. Name: _____ Contact: _____
2. Name: _____ Contact: _____
3. Place: _____ Address: _____
4. Place: _____ Address: _____

STEP 4: PEOPLE WHOM I CAN ASK FOR HELP DURING A CRISIS:

1. Name: _____ Contact: _____
2. Name: _____ Contact: _____
3. Name: _____ Contact: _____

STEP 5: PROFESSIONALS OR PROFESSIONAL SERVICES I CAN CONTACT DURING A CRISIS:

1. Professional/Services Name: _____ Phone: _____
Emergency Contact: _____
2. Professional/Services Name: _____ Phone: _____
Emergency Contact: _____
3. Emergency Department: _____
Emergency Department Address: _____
Emergency Department Phone: _____
4. Crisis Line Phone (e.g. 988): _____

STEP 6: MAKING THE ENVIRONMENT SAFER (PLAN FOR LETHAL MEANS SAFETY):

1. _____
2. _____

The Stanley-Brown Safety Plan is copyrighted by Barbara Stanley, PhD & Gregory K. Brown, PhD (2008, 2021). Individual use of the Stanley-Brown Safety Plan form is permitted. Written permission from the authors is required for any changes to this form or use of this form in the electronic medical record. Additional resources are available from www.suicideprevention.com.

Safety Planning for Behavioral Health Professionals

Digital Tools

- Safety Plan Application
- Stanley-Brown Safety Plan Application

AFTER THE SAFETY PLAN

After Safety Plan Development

- Provide client with original document
 - Provider keeps a copy
- Identify where to keep it
- Set expectations for check-ins and updates
- Discuss potential barriers

When Should Clients Use Their Safety Plan?

- When client is:
 - Experiencing thoughts of suicide
 - Notice any of their warning signs
 - Sensing the onset of a crisis

ROADBLOCKS

Time with Client

- Providers may have limited time with clients
 - Emergency departments
 - Hospital settings (e.g., Primary Care Provider office)
- Be flexible with who works on the safety plan

Client isn't Willing or is Reluctant to Safety Plan

- Explore and address barriers
- Reaffirm importance
- Fill out as much as possible
- Future safety planning opportunities
- Cannot force the process

Lack of Trust in Safety Plans

- Lack of research? – Yes and No
 - Consensus: Adults are benefited from safety planning; decreased suicidal behaviors; mixed results for suicide ideation
 - Further research needed: Effective safety planning for youth, multigenerational and multicultural populations
